6.5PA128

Neonatal Phased Array Probe

*Introducing high performance
and ergonomic design...*

Small-footprint, high-frequency arrays have been part of **STI's** family of products for several years. We've combined our established high-frequency technologies and a new acoustic architecture to serve the needs of the neonatal and pediatric ultrasound market with a new high-frequency phased array.

Features

- 6.5MHz center frequency
- 128 element phased array
- Ergonomic handle design
- Lightweight probe with high flexibility cable
- Small footprint for easy access and patient comfort
