**Subject:** Sound Technology Acquires Tetrad Product Line

I am pleased to inform you that Sound Technology, Inc. has purchased the Tetrad ultrasound transducer product line and related business, from W.L. Gore.

Tetrad is Gore's OEM ultrasound transducer business and is located in Englewood, Colorado. The acquisition strengthens our already leading position as an OEM provider of high-performance and high-quality ultrasound probes and transducers for diagnostic and therapeutic medical applications.

Tetrad's products, technologies, and customers are synergistic with STI's. Our portfolio of innovative product offerings will be strengthened and will now include Tetrad's patented laparoscopic probe technology, a broad surgical ultrasound product line, and an advanced family of external and internal 4-D ultrasound probes.

We look forward to working closely with you as we grow our ultrasound transducer business and expand our market position.
